Index to Volume 58

Adipose tissue distribution, stability of principal components by sex, maturation and ethnicity 719–35
Alcohol usage and blood pressure: A review 1–31
Altitude. see High altitude
Amenorrhea: and bone mineral content in oarswomen 863–9; postpartum, in relation to waiting time to conception and pregnancy rates among Sundanese women 933–44
Anthropometry: and anatomical segmentation in humans 771–82; and interobserver measurement reliability 751–9; and obesity, blood pressure and ABO blood groups 549–84; and prediction of component tissue masses in the minor limb segments of the human body 761–9; of babies and their mothers in relation to fetal ultrasound measurements 43–59; of offspring, in relation to maternal smoking in pregnancy 407–20; of pulmonary tuberculosis patients in Bophuthatswana 251–9
Athletes: bone mineral content of amenorrheic oarswomen 863–9; somatotypes of males in various sports 337–56
Austin, Donald M. Body size and heat tolerance: A computer simulation 153–69

Bailey, Donald A. Subcutaneous fat topography: Age changes and relationship to cardiovascular fitness in Canadians 955–73
Balgir, R. S. Serogenetic studies in Gypsy Sikligars of northwestern India 171–87
Balkau, Beverley J. Immunoglobulin polymorphisms, selective forces and the maintenance of, 79–84
Ballew, Carol, Body composition, altitude differences in, among Bolivian newborns 871–82
Battinelli, Thomas, Height-weight indices and blood lipid levels in normal controls and offspring of conjugal diabetics 601–14
Baumgartner, Richard N. Adipose tissue distribution: The stability of principal components by sex, maturation and ethnicity 719–35
Becque, M. Daniel, Skinfold compression in males and females 33–42
Bennett, Kenneth A. Anthropometry, interobserver measurement reliability in, 751–9
Berenson, G. S. Blood group associations, ABO, with cardiovascular risk factor variables II. Blood pressure, obesity and their anthropometric variables 549–84
Binkhorst, R. A. Human muscle, parameters of the force-velocity curve in relation to body dimensions 221–38
Birth defects, in Blacks and Whites 317–35
Birth weight in Turkish infants 367–78
Blood groups: ABO, blood pressure, obesity and anthropometry 549–84; serogenetic variations in Gypsies of northwestern India 171–87
Blood pressure: and ABO groups, obesity and anthropometry 549–84; and alcohol use 1–31; epidemiology of hypertension in Tibet 504–15
Blumberg, B. S. Hepatitis B virus and sex ratio of offspring in East Greenland 115–20
Body composition: and food intake, cardirespiratory fitness and psychological development in active and inactive children 261–73; of Bolivian newborns 871–82
Body density, fatfolds and girths, changes in, at 2.3 Kg increments of weight loss 709–18
Body dimensions: and heat tolerance 153–69; and muscle force 221–38; and secular trend in Japanese females 293–301; of male athletes in various sports 337–56; stature and biiliac diameter of twins 517–25; stature and subcutaneous fatness from infancy to adulthood 737–50
Body surface area, estimation of, by height and weight 625–38
Body volume, plethysmometric measurement of, 783–99
Boileau, Richard A. Adipose tissue distribution: The stability of principal components by sex, ethnicity and maturation stage 719–35
Boldsen, J. L. Surnames, British, analysis of the geographical distribution of, 85–95
Bone mineral content of elite lightweight amenorrheic oarswomen 863–9
Book reviews: 121–40; 303–16; 461–72; 639–51; 817–29; 993–1000
